OFF THE VINE DINING

ABOUT US

We are a husband and wife team showing our love for people through our food. Our goal is turn moments into memories at every event we serve!

Every menu item that we serve is made from scratch with our own original recipes. As a company, we care about the impact food has on your body, so we are proud to be free from using seed oils and dyes. Our goal is to try to source local ingredients, and to use as much organic products as possible. We only use organic unbleached flour, aluminum and cornstarch free ingredients in our cooking and baking.

We elevate every catering spread by providing fresh flowers and homegrown eucalyptus to match your theme of your event.

The cuisine items on our menus are to simply give you an idea of what we do best, and what our clients love the most. However, should you not find something you were looking for, we take pride in our flexibility to possibly create a menu that you desire.

Our team loves serving people and we cannot wait to serve you and your guests.

With all of our love,

Brian and Alexa Beechler
